

SYNTHETIC TEST DOCUMENT

Cybersecurity maturity assessment

Reference	TL-EN-2026-024
Procurement type	it
Dataset split	test

Important: this is a fictional tender with no personal data. It is for testing only.

1. Key parameters

1. Submission deadline

The final proposal submission deadline is 24 November 2026 at 15:00 UTC; any late bid will be rejected.

2. Maximum contract value

The maximum contract value is USD 390,000 excluding taxes. This amount includes all mandatory supplier costs.

2. Performance and payment

3. Delivery period

The required performance period is within 70 calendar days after the kick-off meeting.

4. Payment terms

The supplier will receive payment within 21 business days after final report acceptance. Nothing is payable before acceptance.

5. Warranty period

The contractor provides a warranty of 15 months, calculated from final acceptance.

3. Security and liability

6. Bid security

Bid security is 1.2%. It must be provided before the proposal deadline.

7. Performance security

Performance security is set at 6.5%. The successful bidder must provide it.

8. Delay penalty

For every day of delay, the contractor is liable for 0.09% of the overdue assessment value, up to 10% of the contract price.
